It's time to clean up PSC in Berkeley! REALLY!

CleanAirCoalition.net is a new mass small claims law suit action for the communities of Berkeley, Albany and El Cerrito. Our work puts legal muscle in support of many of the demands that the West Berkeley Alliance for Clean Air and Safe Jobs delivered to BAAQMD at their community meeting on 1/31/06. The community has suffered for decades and now requires a "clean up strategy with teeth" to bring PSC into compliance: <http://www.cleanaircoalition.net> .

There are a growing number of individuals who feel it is necessary to turn up the heat on PSC. Specifically, we intend to file multiple lawsuits through Small Claims to force PSC to give us a better solution than the "Settlement" BAAQMD has arranged or, failing that, make them pay us for our damages. We have contacted Neighborhood Solutions for their support and they are already on board working and consulting with us to help this move forward quickly.

The Mission:

*To form a multi-city coalition of concerned residents...
... and build a community nuisance action law suit to bring
Pacific Steel Castings Corp. to the table...
... and clean up PSC's toxic emissions.
We have rights. It's time to get together and clean our air!*

Together, as citizens defending our rights to the enjoyment of our lives and property, we intend to make Pacific Steel Casting Corporation STOP polluting our air and PAY us for being subjected to their nasty emissions! PSC is causing a nuisance as defined by California State Law Public Nuisance 3479 and is liable for damages to anyone who has been adversely affected by this nuisance.

Residents may be eligible to file a claim for damages of up to \$7,500.00!

Please see the web site, including our **Demand Letter to PSC**, and call Mr. Paul anytime with questions.

Thank you.
